Ascom Ofelia

Simplifying enterprise alarm and workflow management

ascom **félia**

## Centralize. Supervise. Mobilize

Ascom Ofelia is an enterprise-grade alarm and workflow management suite. Its pioneering graphical environment—including truly interactive maps of your facility—lets you manage responses to production, equipment and personal safety alarms. And its advanced statistical analysis tool enables ongoing reviews and safety and operational improvements.

Design your own response plan

Customization is a key feature of Ascom Ofelia. No matter the size and/or complexity of your facility and processes, you can design alert management scenarios that match your organization's rules.

Benefits at a glance

- Interactive HTML5 graphical environment; easy to locate critical events and to direct responses

- Fully interoperable with third-party systems via Modbus, OPC; UA, ESPA, SIP and other protocols

- Empower mobile employees—alerts go directly to employees' smartphones and/or tablets

- Maximum uptime thanks to proven, robust architecture

- Features an advanced statistical analysis tool for trends analyses and continuous improvements

- Customize your own workflows and alarm-trigger rules

- Configure alarm notifications with up to five priority levels; with each level having its own color code

Don't just think about a critical incident. See it

Ascom Ofelia is all about intuitive, graphical alarm management. With truly interactive maps of your facility, you can easily locate the point of origin of an alert, and supervise responses to an unfolding critical event. Workflow management, too, is easy, thanks to a detailed, yet user-friendly graphical environment.

Proven and trusted

The Ofelia platform is used and trusted by many of the world's premier manufacturing and industrial companies. Click here to read some case stories. Or contact **info@ascom.com** to ask for more information.

Technical requirements
