

Enhancing Digital Whiteboard Solutions

Ascom helps you do more with your digital whiteboard solution. Our open, standards-based software integration with the Ascom Healthcare Platform (AHP) enhances the capabilities of today's digital whiteboard technology. By providing assignment and event-based source data to digital white boards, we enhance visualization and the user experience... for the patient, family and staff members. And we support this enhanced visualization at the point of need... wherever that may be. Digital whiteboards provide a visualization tool to supplement, rather than replace, nurse call systems, which must comply with UL 1069 annunciations.

Ascom Healthcare Platform integrations to digital whiteboards optimize the capabilities from both solutions, helping you do more with your existing investments.

More than 2,200 acute care hospitals in North America rely on Ascom technology to provide solutions from nurse call to smarter alarming and alerting to mobile devices. The Ascom Healthcare Platform integrates with hundreds of medical devices across a range of device types....now including digital whiteboards.

Key features

Benefits of Ascom integration with digital whiteboard solutions

Near-real time patient data

Overview of patient status related to assignment and event-based data, including staff alerts for critical response

Improving communication

Visibility to staff updates and patient-facing information like caregiver names, roles, precautions and patient requests

Better task coordination and reminders

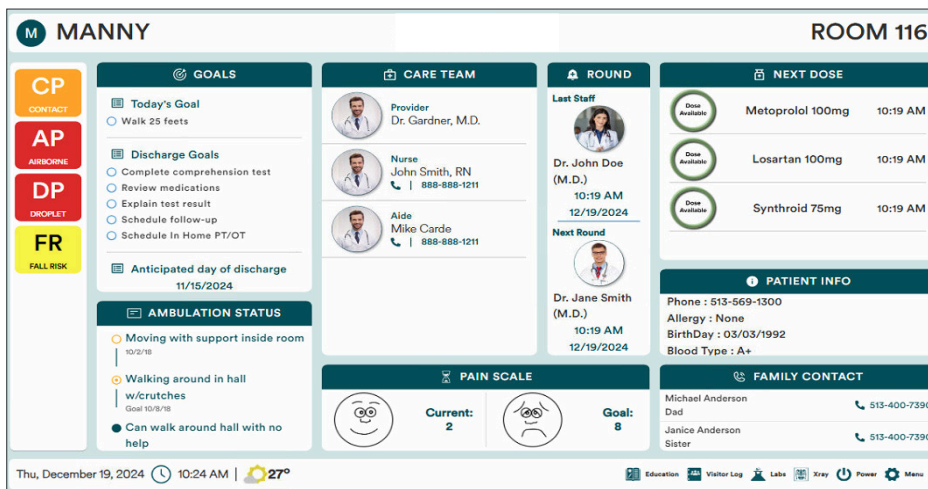

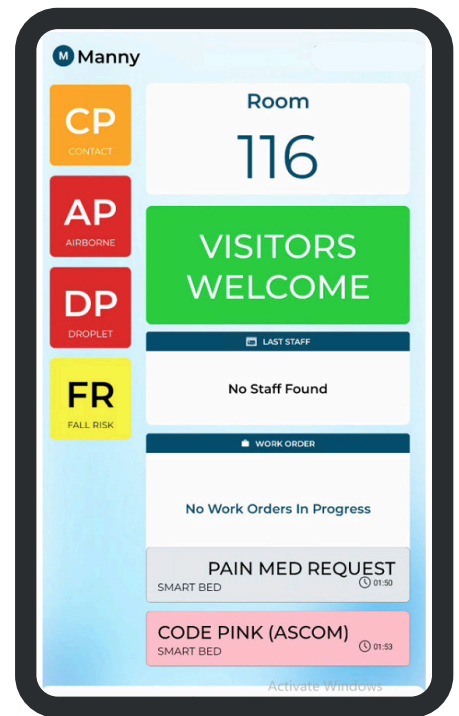

Task management with prioritization and reminder notifications help automate task coordination and handover assistance

Stronger patient and family engagement

Interactive features let patients see staff assignment, staff requests, staff rounding, scheduled treatments and transfer / discharge information

Optimized workflows and efficiency

Streamline staff and user experiences with integrations that enhance visualization, interaction and collaboration
